I. Introduction

In the context of the global Blockchain industry is in a substantial development momentum, the establishment of cryptocurrency exchanges to meet users' needs is inevitable.

In addition, centralized exchanges with new features that adapt to the diverse needs will become even stronger in the later periods. They will become an important bridge in bringing users access to the future of world finance.

Based on this vision, FMCPAY was established with the enthusiasm of the founding team. This white paper will provide full details about FMCPAY Exchange, as well as about its native token, \$FMC.

II. Problems

Some of the problems that cryptocurrency exchanges are currently facing:

- **Poor technical performance:**

A good centralized exchange needs to ensure that its database platform runs smoothly and can handle a large amount of user activity. Since some current exchanges cannot meet this condition, FMCPAY's professional team has optimized the stability of the system, providing a convenient and safe trading platform.

- **Poor liquidity:**

Newly established exchanges often face the problem of low liquidity, leading to high slippage rates, especially during a bear market when trading volume drops. Advised by experts who have worked at leading exchanges and advanced technologies, FMCPAY can ensure ample liquidity and low slippage rate.

- **Unprofessional customer support:**

When it comes to an exchange, the team understands that it is not just about cash flow, technology, profits, but also customer experience. Any questions and complaints from users will be handled by us in the most professional and fastest way.

III. FMCPAY Exchange

- **About FMCPAY Exchange:**

Officially put into operation from April 2021, FMCPAY is a cryptocurrency and digital asset exchange, headquartered in the United States. Built on the TRON blockchain, FMCPAY can guarantee security, transaction processing speed, network scalability and reliability.

- **Feature Rollout:**

At the present time, FMCPAY is providing the following features:

- Spot trading
- P2P
- Margin trading
- Staking
- Tokenized Stocks (Coming soon)

As FMCPAY's user base grows, many new features will be added in the future.

- **Matching Engine:**

FMCPAY's order matching mechanism allows processing and maintaining up to 1,000,000 transactions per second, minimizing order congestion and help users trade conveniently.

III. FMCPAY Exchange

- **Coins and Tokens:**

FMCPAY currently supports trading pairs in the following coins:

- Bitcoin (BTC)
- Ethereum (ETH)
- Fimarkcoin (FMC)
- PayNet Coin (PAYN)
- Tron (TRX)

And more than 60 trading pairs. More coins will be added overtime.

- **Device Coverage:**

FMCPAY is now available on:

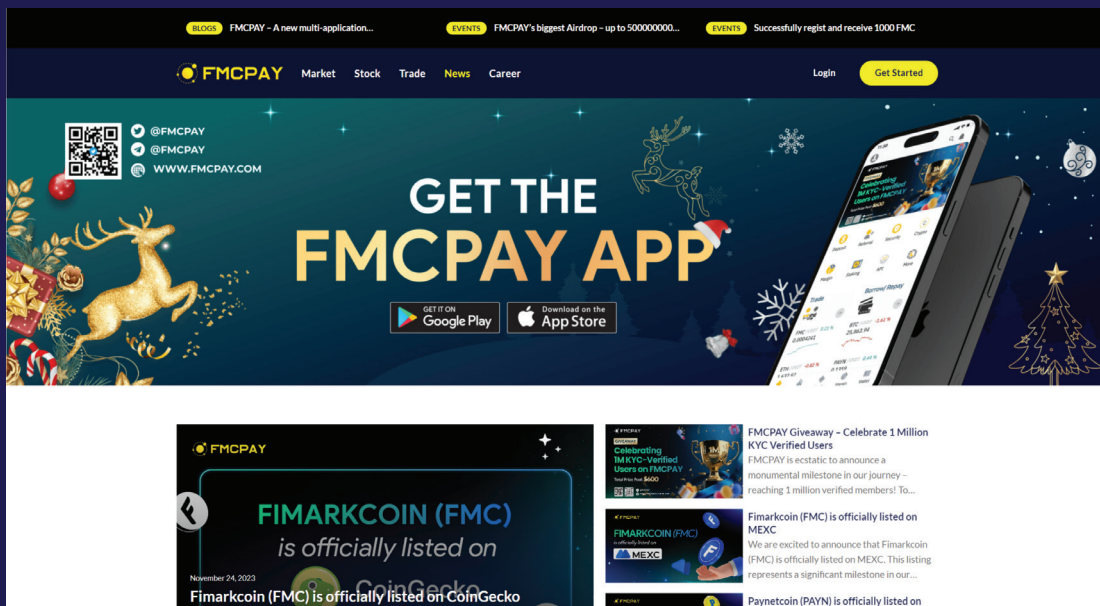

- Website: <https://fmcpay.com/>
- IOS devices:
<https://apps.apple.com/sg/app/fmcpay/id1573381060>
- Android devices: <https://play.google.com/store/apps/details?id=com.bitcoinexc&hl=vi&gl=US&pli=1>

As the number of users increases over time, FMCPAY will be available on more platforms and devices.

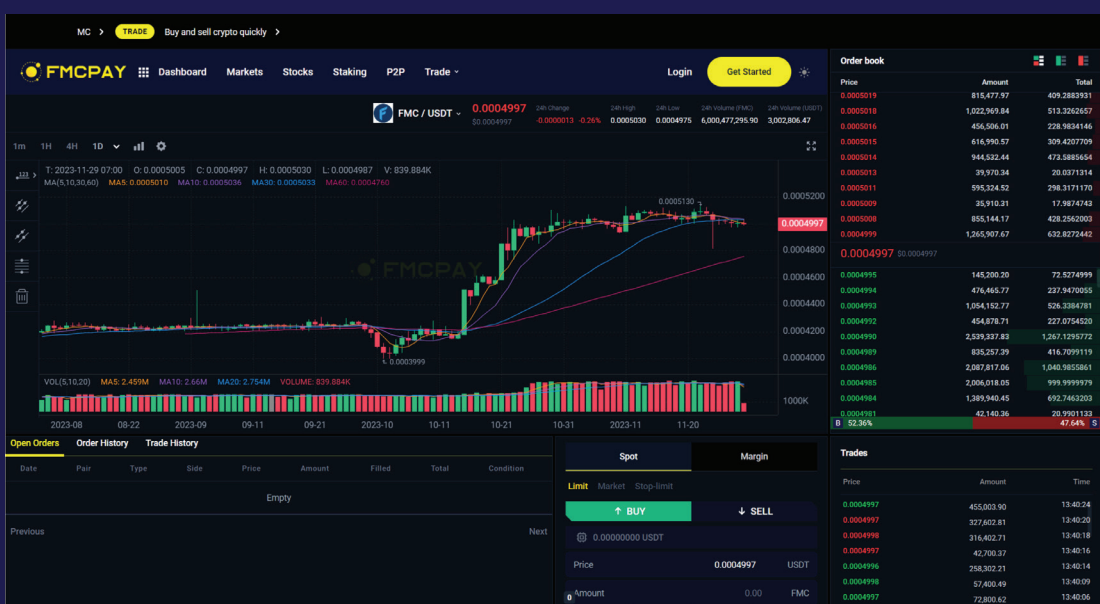

III. FMCPAY Exchange

- **Revenue Model:**

FMCPAY revenue will come from the following sources:

- Trading fee: the fee rates depend on fiat markets and trading pairs. Based on the level of your account, we have different transaction fee reductions and requirements.
- Withdrawal fee: each token/coin will have a different withdrawal fee. We will adjust the withdrawal fees according to the cryptocurrency market's performance.
- Margin fee: the interest rate depends on investor's borrowed funds.
- Listing fee: apply to token/coin list on FMCPAY.
- Other fee: apply for future features of the FMCPAY ecosystem.

- **Support:**

Any questions or complaints from customers will be resolved quickly and reasonably with our experienced customer care team. Currently, FMCPAY team only provide support in English. Support option in other languages will be available in the future. If user has any problems or concerns, please contact the FMCPAY team via:

- Email: support@fmcpay.com
- Facebook: <https://www.facebook.com/fmcpay>
- Twitter: <https://twitter.com/FMCPay>
- Telegram: <https://t.me/FMCPAYGlobalChat>

IV. Fimarkcoin (FMC)

- **About Fimarkcoin (FMC):**

Fimarkcoin is the native token of FMCPAY Exchange, aiming to simplify payment processes and enable efficient co-payment of transaction fees and travel expenses. It offers a streamlined approach to co-payment, reducing friction and enhancing the payment experience.

Token symbol	FMC
Launch year	2021
Blockchain	TRON (TRC20)
Total supply	128.318.618.918
Consensus mechanism	Proof of Stake (POS)
Contract	TF8EjxT89LmcUNKV3fq55oeD5V44V7tjo2

IV. Fimarkcoin (FMC)

- **Token Utilities:**

At the moment, the purpose of using FMC Token on the exchange is mainly to pay for transaction fees, exchange fees and other services in the financial ecosystem of FMCPAY. FMC holders can get special offers when new features are released in the future.

- **Allocation:**

IV. Fimarkcoin (FMC)

- **Repurchasing Plan:**

Every year, FMCPAY team will use a part of profits to repurchase token FMC and burn them until 50% of total supply is burned. All buyback transactions will be announced on the blockchain and on FMCPAY's communication channels.

V. About the team

- **A world-class team:**

Integrated with many outstanding features, what makes FMCPAY successful is the solid team behind it. FMCPAY's team includes contributions from leading experts in traditional finance, fintech and cryptocurrency. They are the ones who really understand how a cryptocurrency exchange works, as well as how to provide the best user experience.

In addition, FMCPAY's technical infrastructure is also underpinned by blockchain engineers and developers with many years of experience, providing stable, seamless and highly secure operation.

With a shared vision, the team is committed to bringing the best quality products to users, elevating the trading experience of investors to a new level.

VI. Roadmap

Q2 2021

Launch FMCPAY Exchange
Launch FMCPAY IOS and
Android application

Q4 2021

KYC system test launch
FMC airdrop campaigns

Q3 2022

Add new trading pairs
Upgrading the trading and
deposit/withdrawal system

Q1 2022

KYC launch
Launch margin trading

Q4 2022

List FMC on CEXs
Upgrade staking mechanism

2023

Listing on CoinGecko
Add more trading pairs and
new token listing

Q4 2024

FMCPAY Payment Ecosystem
P2P transactions
Token swap

Q2 2024

Tokenized stocks trading
Launch Online Payment
Processor for FMCPAY system

2025

NFT marketplace
Pool farming
Integration of services

and the journey continues...
